DEBTS OF THE CHARITY HOSPITAL—NONE.

REPORT.

To the Honorable the Senate

and House of Representatives of the State of Louisiana:

In compliance with the act of the Legislature, framed in 1814, the following report of the Board of Administrators of the Charity Hospital is respectfully submitted to your honorable bodies.

The tabular documents annexed exhibit the annual statement of affairs for the year 1867.

The Clerk's report shows that the number of patients admitted into the Hospital during the year was 8,612; discharged, 7,260; died 1,438. Of this number, 6,484 were of foreign birth; natives, 2,100; unknown, 28.

It will be seen from the Treasurer's report that the balance of funds on hand at the commencement of the year was.. \$42,819 26
Income received during the year..... 123,017 95

Total income.....	\$165,837 21
Expended during the year, statement A..	\$114,046 39
“ “ “ “ B..	14,558 21—\$128,604 60
Balance January 1st, 1868.....	\$37,232 61

We would respectfully remind your honorable bodies that no direct appropriation has been made by the General Assembly for the benefit of this institution since the year 1864. The General Assembly of that year appropriated the sum of \$40,000.

The chief revenue of this institution is now derived from the United States Government. By referring to the report of the Treasurer, it will be seen that the sum of \$67,523 was paid to this Hospital by the Government for board, medical and surgical treatment of United States seamen. Without this source of revenue, it would be impossible to sustain this institution, inasmuch as the revenue derived from the State is totally inadequate for its support.

The chief State revenue is derived from the tax on lotteries. The sum derived from this source during the year amounted to \$30,636 89 in State treasury notes, some of which we have been compelled to sell at so low a rate as fifty cents on the dollar. We would respectfully suggest to your honorable bodies that section 9 of act 21 of the Legislature of 1867 be amended as follows:

Be it further enacted, etc., That the funds arising from the licenses, taxes, per centage for signing or stamping lottery tickets, fines and forfeitures collected under the provisions of this act shall be devoted to the support and maintenance of the Charity Hospital of the city of New Orleans; *Provided,* That not more than \$50,000 shall be paid to the said Hospital in any one year. The aforesaid sum to be paid to the Treasurer of the Charity Hospital in *United States currency.*

We earnestly suggest to your honorable bodies to adopt this or such other method as in your judgment may seem best of making the revenue derived to the Hospital from this source payable in United States currency.

The revenue derived from the tax on foreign immigrants, which, in 1854, amounted to upwards of \$71,000 has dwindled down to \$6,460 75, and this year will probably not reach \$5,000, a large proportion of which will consist of city and State currency. Many of the consignees refusing to pay in United States currency.

We respectfully suggest that section 3 of the act of 1850 be so amended as to read as follows:

It shall be lawful for any person referred to in the foregoing section, who may be unable or unwilling to furnish bond, as thereby required, to commute therefor by paying within twenty-four hours after his or her arrival, the sum of two dollars and fifty cents in *United States currency.*

The Legislature of the year 1838 authorized the Administrators of the Charity Hospital to demand and receive annually from each Theater the sum of \$500.

The Legislature of 1857 amended this act, (vide act 205, 1857,) reducing the tax to the sum of \$100 and an annual benefit. The amounts derived from the benefits are merely nominal. In some instances, according to the reports of the managers, the expenses are not realized. In 1865, the benefit at the St. Charles Theater brought the Hospital in debt to the extent of \$900, but the manager very magnanimously abstained from exacting it. In 1866 the Hospital realized from the benefit at the St. Charles Theater the

sum of \$3 85. Last year the proceeds from the same source amounted to \$0 00. In view of these facts, we venture to suggest to your honorable bodies the propriety of re-enacting the original law, and fixing the annual tax at \$500, or any other specific sum which in your judgment may seem best.

Should your honorable bodies by means of the method suggested, or any other which in your judgment may seem best, enable this institution to collect the tax on lotteries, and the tax on foreign immigrants in United States currency, the revenue derived from these sources, and that derived from the United States Government, will be sufficient to sustain the Hospital, and obviate the necessity of making annual appeals to the General Assembly for assistance.

In 1847, the Hon. Isaac Johnson, Governor of the State of Louisiana and ex-officio President of the Board of Administrators of the Charity Hospital, in his report to the General Assembly, says: "In connexion with this subject, it may be proper to lay before the General Assembly the evident necessity of the creation of an Alms House, wherein a proper system of labor could be organized, for the reception, employment and instruction in various branches of mechanical pursuits of the indigent and vagrants who accumulate yearly in great numbers in this metropolis. A large proportion of these encumber the wards of the Charity Hospital, under the plea of disordered health, and whose diseased condition is exclusively owing to their being completely destitute of all the necessaries of life. An institution of this kind would, after a lapse of time left for experiment with proper managers or contractors, and a wise direction given to the labor of its inmates, become a source of profit to the State, in the same manner as the Penitentiaries of this and other States. It might usefully employ a host of paupers, whose only recourse is mendicancy or vice."

The Hon. J. A. Brand being at that time Vice President of the Board of Administrators, in alluding to this suggestion, says in his report to the Legislature of 1857: "The experience of each year since adds new strength to this suggestion, and new claims for the establishment. Such an institution would remove much of the onus imposed upon the Charity Hospital."

We heartily concur in the above views, and take the liberty of again calling the attention of the General Assembly to the importance of taking this matter into consideration.

In conclusion, we feel it due to the officers of this institution to say that they have discharged their respective duties with fidelity,

zeal and ability; and we renew our heartfelt thanks to the Sisters of Charity for their benevolent, practical assistance rendered this institution. Their efforts in behalf of suffering humanity are as untiring as their motives are disinterested.

DAN. C. HOLLIDAY, M. D.,
Vice President Board of Administrators.
